Dear Lou,

Hope all is well with you.

When I gave you a copy of my book, ?Madness and Memory?, last May, I was embarrassed and upset to find that you had been removed somewhere in the editing process.

I am happy to say that this has been corrected in the paperback edition where I had a few opportunities to make changes. Enclosed is a new page that I have asked to be included in the paperback edition of my book, which will be available this fall.

I am so pleased that this terrible omission will finally be rectified.

Hope we can have lunch or dinner in Washington sometime soon.

All the best,

Stan
